### Unique Selling Points

- **Your very own personal assistant**– “Siri” can understand natural language because she knows what you say, and what you mean. You can ask Siri “Remind me to call mum when I get home” or “Do I need an umbrella?” to get a weather report. You can make phone calls, send messages, schedules meetings, set reminders and more. How much more? Just ask, and Siri tells you that too.
- **Two cores in the A5 chip deliver up to two times more power and up to 7 times faster graphics than the iPhone 4**- And you’ll feel the effects. Fast. iPhone 4S is quick and responsive when you’re launching apps, browsing the mobile web and playing games. No matter what you’re doing, you can keep on doing it. The iPhone 4S has an outstanding battery life when compared with iPhone 4. because the A5 chip is so power-efficient.
- **A brilliant camera on a phone**- And with all-new optics and an new 8 mega-pixel sensor, it just might be the only camera you need. Behind every shot, you’ve got 8 mega-pixel resolution and a custom lens with a larger f/2.4 aperture for great performance in low light. Plus, with an improved backside illuminated sensor, excellent auto white balance, advanced colour accuracy, face detection and reduced motion blur, no matter how many people, how much light and how much action you capture, everything looks just as it should.
- **Shoot stunning 1080p HD video everywhere you go**-With all-new optics, the light is right, the colour is vivid and everything will look just the way you remember. Video stabilisation steadies shaky shots. And you can edit video right there on iPhone and share your lush life as fast as you shoot.
